## AFTERCARE ADVICE SEMI-PERMANENT MAKEUP

---

FOR YOUR HEALTH AND WELLBEING, AS WELL AS THE LONGEVITY AND EFFECTIVENESS OF YOUR TREATMENT, PLEASE FOLLOW THE AFTERCARE ADVICE FULLY.

Keep the area dry for 7 days after your treatment.

-

Avoid strenuous exercise after your treatment until the scabbing stage of healing is complete.

-

Avoid facial treatments for 10-14 days after your treatment.

-

Do not apply any creams to the treatment area whilst it is still healing. Vaseline may be applied after the area has completed healing.

-

Avoid touching, or applying makeup to the treatment area until it has healed.

-

Avoid picking, itching and rubbing the treatment area.

-

Avoid direct sun exposure and sun beds for 2 weeks after your treatment.

-

Expect some tenderness in the area after your treatment.

-

Expect pigment to fade up to around 40% after your first treatment.

-

Patchiness whilst healing is normal. This will be reviewed at your top-up treatment.

-

You can remove scabs in the treatment area by gently washing with soapy water. This should only be done from 7 days after your treatment.
